Artificial Insemination Refresher course

SCAIREFR23

Course Overview:

This short course aims to update the knowledge and skills in those performing artificial insemination (AI) in the dairy and beef industries.

This course is designed for people who have previously completed an AI course and therefore have a basic understanding of AI to build upon.

This course is not for beginners. Those looking to get into the industry or diversify their farming skill set should firstly complete the Artificial Insemination and Fertility Management in Cattle (SA3AIFMC23) course.

Attendance & Commitment:

Students are expected to:

- Attend a 2-hour introductory webinar
- Spend approx. 6 hours working through their learning materials
- Attend a 1-day workshop (9:00am - 4:00pm) for practical training

The practical training will consist of theory review and a Q & A session to demonstrate knowledge retention.

An AI simulation practice will take place within the morning session and two live cow AI sessions in the afternoon.

Learners have the option of bringing their own AI equipment or they can use GOTAFE resources.

Course Dates, Times & Location:

Duration	2 Days
Start Dates	September 6 September 20
Location	Shepparton, William Orr Campus
Delivery Mode	Blended

Course Fees:

Full Fee: \$325.00

Further Study:

After completing this short course, you might like to undertake further study in:

- AHC30221 Certificate III in Agriculture (Dairy Production)
- AHC30116 Certificate III in Agriculture
